-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The allowance of claims 13 and 14 has been withdrawn due to new grounds of rejection.

The examiner regrets any inconvenience to Applicants.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 13 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al (US 2002/0101528).

With regard to claims 13 and 14, Lee et al discloses in Fig. 4, a method for facilitating high signal throughput of an improved CMOS image sensor chip (pixel array 102 includes a plurality of photo sensors, (paragraph EO038)) comprising a plurality of photo sensors configured in a two-dimensional area (APS pixel array 12, [0026]), said method comprising reading out charge signals from said plurality of photo sensors row by row in parallel to respective column buses coupled to a double sampling circuit and a programmable gain amplifier (CDS circuit is coupled to a pixel column so as to receive a pixel image signal from the column and since the signal is generated without a level of noise reduced, the CDS circuits is connected to a PGA circuit where the signals are conditioned in the PGA circuit by amplification of the PGA), signals are digitized (ADC circuits 118 (0039) are coupled to the CDS circuits and

process the signals in parallel)); It is noted that ADC circuits process the signals in accordance with a result from the PGA.

3. Claims 15-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 19 and 21-41 are allowed.

5. This office action is not made Final since new grounds of rejection applied to claims 13 and 14.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to TUAN HO whose telephone number is (571) 272-7365. The examiner can normally be reached on Mon-Fri from 7AM to 4PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's acting supervisor, David Ometz can be reached on (571) 272-7593. The fax phone number for the organization where this application or proceeding is assigned is (572) 273-8300.
